

Hosting Sensitive Data to a Canadian Cloud

Mapol Inc. is the pharmaceutical industry's leading experts on private and public payer drug plans in Canada. With over 85 years of combined experience within the pharmaceutical and payer industries, Mapol's products and services are tailored to meet the needs of those working for pharmaceutical manufacturers in the areas of patient access and product reimbursement.

The Challenge

DATA RESIDENCY

Ensure that all data resides in Canada.

SECURITY AND HIGH AVAILABILITY

Security and data redundancy for the use of industry-leading technologies in delivering practical data visualization tools to their clients.

SCALABILITY

An important factor for Mapol's ongoing commitment to research with the constant gathering and interpretation of business information from various sources to ensure their product offerings are robust and maintain relevancy for their clients.

The Solution

Upon stringent due diligence, the organization selected Server Cloud Canada to simplify its data management strategy. With their distributed and fully redundant infrastructure in 9 secured datacenters across Canada, Server Cloud Canada worked with Mapol to host its data for ease of accessibility and scalability as required. A solution that provided Mapol with a web based accessible portal for ease of infrastructure management and reporting.

The Results

- ✓ Capital and Operational expense reductions.
- ✓ Flexibility in a scalable environment on demand.
- ✓ A true business continuity plan, distributed data environments for ease of accessibility for employee and clients - high availability.

"Server Cloud Canada helped our organization focus on what really matters to us, our clients!"

- Mapol Inc.

Solution Overview

DESCRIPTION

Analytical Data that can be accessed from anywhere. Must be kept in Canada.

INDUSTRY

Health Care

GEOGRAPHY

Canada

CHALLENGES

- ✓ Partner they can trust.
- ✓ Stability for growth.
- ✓ No downtime.

SOLUTION

Server Cloud Canada met all requirements. Datacenters were government regulated. Technical team gave the best solution and service. With 9 datacenters across Canada, this will make it easy to scale up and ensure proper data redundancy for high availability

BENEFITS

- ✓ Improve data quality process.
- ✓ Time to perform enhancements and make changes on the fly.
- ✓ Enabling IT team to concentrate on client focussed technologies.
